Summary

Skilled full-stack software developer with hands-on experience in building and deploying web applications, including food delivery systems, e-commerce platforms, and airline management solutions using HTML, CSS, JavaScript, Java, and Python. Certified in Data Structures and Algorithms, Microsoft Azure Security (AZ-500), MySQL, and RPA (Automation Anywhere). Proficient in cloud computing, database management, automation, and security. Passionate about building scalable, user-friendly applications while continuously expanding expertise in emerging technologies.

Experience

Summer Intern — Geeks for Geeks   June 2024 – July 2024

- Completed intensive training in Data Structures and Algorithms (DSA), enhancing problem-solving and algo- rhythmic thinking.
- Solved hands-on coding challenges focusing on optimization and efficiency.
- Successfully implemented the N-Queen Problem using backtracking and recursive algorithms.
- Gained practical experience in coding, debugging, and algorithm design in a professional environment.

Certifications

Microsoft Azure Security Engineer Associate (AZ-500) 🔗   Apr 2025

- Expertise in Azure security solutions: identity management, platform protection, data security.
- Configured Azure Security Center, network security groups, and Azure Key Vault.
- Implemented threat detection, incident response, and compliance monitoring using Azure Sentinel.

Automation Anywhere Certified Essentials RPA Professional 🔗   Dec 2023

- Skilled in RPA development using Automation Anywhere: bot creation, Control Room management.
- Proficient in workflow automation, task scheduling, API integration, and cognitive automation.
- Experienced with error handling, debugging, and delivering process optimization solutions.

MySQL Implementation Certified Associate 🔗   June 2025

- Proficient in MySQL database design, query optimization, normalization, and indexing.
- Hands-on experience with data manipulation, backup/recovery, user management, and database security.
- Knowledge of MySQL architecture, storage engines, and transactional processing.

Projects

Food Delivery Web Application | PHP, HTML, CSS, JavaScript, MySQL 🐙

- Developed a responsive full-stack online food ordering platform with user authentication and session management.
- Implemented dynamic shopping cart, real-time order tracking, payment gateway integration, and CRUD operations.
- Designed mobile-responsive UI with cross-browser compatibility, form validation, and secure data handling.

Education

Bachelor of Technology (B.Tech), Computer Science and Engineering   May 2025
Lovely Professional University, Phagwara, Punjab

Technical Skills

Languages: Python, JavaScript, HTML, CSS, Bash, Java

Technologies & Tools: Git, GitHub, Linux, Networking, MongoDB, MySQL, Azure, AWS, React, Node.js, Express.js, Automation Anywhere, Blue Prism
